Just start selling within days...

Our eCommerce System has been specially developed for small and medium size businesses to make the process of setting up and running an online shop as easy as possible. It is a feature packed web-based system that reduces the work overload of publishing products and trading online.

We build online stores with bespoke design (based on your business requirements) that includes visual elements and functionality to give your customers the confidence and direction needed to complete an online purchase.

With Our eCommerce System, you can grow your business, lower overhead costs, and enhance customer satisfaction. It enables you to manage an online store where customers can easily view your products and purchase them on the Web.

We have a full set of web design tools and expertise to build your online presence based on your own criteria and design Web pages that best reflect your business ethics, culture and image.

Our eCommerce Stores are best suited for products such as Baby products, Jewellery & Watches, Gift Items, Clothing, Home Accessories, Electronics, Wedding Accessories, Flower & Cake Shop and more.

“The urbanshops eCommerce system enables you to expand your business with online stores open 24/7 for customers to find and purchase your products and services”
